CEMENTOS CEMENTS

Desde que, a principios del siglo XX, Le Corbusier y otros maestros de la Arquitectura Moderna, encumbraran el hormigón al estatus de material noble, el cemento no ha dejado de ser tendencia, llegando a convertirse ya, de hecho, en un material clásico de revestimiento.

Porque cemento es sinónimo de modernidad y vanguardia, en TAU seguimos apostando por este material para revestir cualquier espacio interior o exterior y proponemos su combinación con otras texturas más cálidas, con efectos metalizados, con colores de tendencia y decoraciones geométricas.

Since Le Corbusier and other masters of modern architecture elevated concrete to the ranks of a fine-quality material in the early 20th century, cement has remained in fashion. Indeed, it is now a classic covering material.

Because cement is synonymous with cutting-edge modern looks, at TAU we continue to regard this as one of our star materials for dressing up living spaces indoors and out. We combine it with other warmer textures, metal effects, trendsetting colours and geometrical motifs.
